Provisions May Prolong Debate.

ALLISON FOR NIGHT SESSIONS.

House Will be on Waiting Orders all Week - John Russell Young Takes Charge of the Congressional Library. Mr. Spoffard Retained-Summer Navel Maneuvers-Indiana Postmasters.

WASHINGTON, July 5.—The outlook for the week in the senate & quite uncertain. There is every probability that the tariff bill will be passed but whether early or late in the week is by no means certain. The various provisions for a stamp tax, for a beet sugar bounty and for the suppression of trusts threaten to develop considerable debate, and there Senators Bate, Mills, Chilfon, Allen and others. Senator Allison has given notice of an effort to secure night sessions. The present indications are that there will be a determined effort to force the committee on finance to restere the sugar bounty provision, and upon the success or failure of this effort probably will largely depend the length of time

yet to be consumed in the senate. When the tariff bill comes over to the house this week the programme is to send it immediately to conference. The minority will make no opposition to this if the Republicans will assure them bill is reported back by the conferces. permit. To this the Republican leaders express their assent though no determination chiming of church bells found the presihas yet been made of how long a dent wending his way to the First M. "reasonable" time is. Mr. Bailey thinks three or four days will be sufficient. In view of the fact that the bill may return to the house any day the order for sessions only on Mondays and Thursdays will probably be revoked or recess will be taken from day to day until the bill passes the senate.

Mr. Spoffard, who Mr. Young

Mr. Young said that the president had instructed him to make his appointments slowly and with the utmost care, to consider in each candidate nothing but special fitness, to remember that the institution was unique and technical, and that when the appointments were made the president would cover them into the civil service. It had given him the greatest pleasure, Mr. Young remarked, to continue Mr. Spofford. He has known him intimately for many years and realizes the value of his experience and ability. Mr. Young added that he had resolved on no other appointments as yet. He had taken the office without a promise or obligation of any kind. It was not his intention to make changes in the present service ex-

here in attendance upon the People's party conference, which met today, discuss quite freely what the convention should do and do not seem agreed upon what it will do, though the prevailing idea seems to be party reorganization in order to put an end to dissatisfaction which has arisen in the party on account of occurences within the past year.

No action can be taken except the adoption of resolutions, though some, including F. W. D. Mays, think it not improbable that resolutions criticising the actions of some members of the national committee will be adopted.

The anti-fusion sentiment is strong and whatever action is taken it is believed will be in favor of independence and against fusion.

Fully 100 mines were represented at the miners' convention on Saturday by 55 delegates. This is a larger attendance than at any convention since the great strike of 1894. The resolution It was also discovered that a diamond adopted requesting Governor Hastings to sign the weighing and coal commission bills passed by the legislature and now before him.

One of the significant points about the convention Saturday was the fact that no representatives were present from the mines where iron-clad contracts and signed agreements exist. Those mines employ almost 3,000 men. It is not known what they will do, but if the men at one of the mines refuse to quit, all the diggers at the others will

act accordingly. The operators are making no effort to conciliate the miners. Not an operator can be found who will say the miner are entitled to what they demand, 6 cents a ton. No effort will be made to operate the mines unless it should be the river mines, hence no trouble is an-

One point made by the operators is that more mining companies have gone into the hands of the sheriff this year than during any year in the history of the trade. "There are too many mines, said Patrick Dolan, "not too many miners. It is the surplus of operators that

When a person is losing flesh and wasting away there is cause for alarm. Nothing so worries a physician. Consumptives would never die if they could regain their usual weight. In fact there would be no consumption if there was no wasting of the system. The cause of this loss of flesh is a failure to properly digest the food eaten. Ninc-tenths of all our diseases date back to some derangement of the stomach.

The Shaker Digestive Cordial wil James H. Willard, of Bedford, made stop this wasting of the body. It acts by causing the food we eat to be digested so as to do good, for undigested food does more harm than good. The Cordial contains food already digested and is a

John R. McLean's Great Newspaper.

Without a single exception, there beyond doubt no greater or more gular newspaper in the United states than the Cincinnati Enquirer; a more successful publisher than proprietor, Mr. John R. McLean. The old-time prices for the Daily inquirer have been maintained, and year; hard times and cheaper joureals failing to arrest its onward march and high appreciation of the public or its true worth and merit.

The Weekly Enquirer at beginning ef the campaign year was offered at 50 cents a year, and its circulation increased by the addition of over 200,000 new subscribers; the most substantial and coveted testimonial a

publisher could desire. When asked for the secret of such uccess, Mr. McLean frankly answers: The Enquiry has no opinions to force upon its patrons, it simply prints the facts and tells the truth that the reader may form his own cpinions. By maintaining the price of the paper, more news and greater variety can be furnished, and every class of business interests catered to, which a cheaper

ournal cannot afford. The very liberal support given the Enquirer by the public at large, makes incumbent upon the management to serve it faithfully with zeal and enterprise in minor matters as well as those of greater magnitude.

Christian Citizenship League Efforts in Fourth of July Celebrations.

CHICAGO, July 5 .- The officers of the National Christian Citizenship league are very much pleased at the result of their efforts to secure a Fourth of July celebration along the lines of their platsquadron. The battleships will be the form of principles. Their correspondence for the past month has been very heavy, letters coming from all sections of the country endorsing their plans and telling of efforts to carry them out.

Mr. Edwin D. Whitlock, the president, said today: "The league began its work" for a new Fourth three years ago. The interest has increased each year, but the result this year is beyond all others. The south has joined the north and the east and the west in the plea for a higher citizenship and the application of christian patriotism to public affairs.

Wanted-An Idea

John P. McLean's Great Newspaper.

Without a single exception, there beyond doubt no greater or more ular newspaper in the United states than the Cincinnati Enquirer; a more successful publisher than proprietor, Mr. John R. McLean. The old-time prices for the Daily inquirer have been maintained, and a circulation largely increased each year; hard times and cheaper joureals failing to arrest its onward march and high appreciation of the public or its true worth and merit.

The Weekly Enquirer at beginning ef the campaign year was offered at 50 cents a year, and its circulation increased by the addition of over 200,000 new subscribers; the most substantial and coveted testimonial a sublisher could desire.

When asked for the secret of such uccess, Mr. McLean frankly answers: The Enquirer has no opinions to force upon its patrons, it simply prints the facts and tells the truth that the reader may form his own cpinions. By maintaining the price of the paper, more news and greater variety can be furnished, and every class of business interests catered to, which a cheaper

ournal cannot afford. The very liberal support given the Enquirer by the public at large, makes incumbent upon the management to serve it faithfully with zeal and enterprise in minor matters as well as those of greater magnitude.
